Operations and Maintenance Summary	175

MESSAGE FROM MoDOT

Missourians are entrusted with one of the largest transportation systems in the nation; seventh in terms of size, with 33,811 miles of roads and 10,392 bridges and culverts. To maintain and improve this system, Missouri drivers pay an average of \$34 per month in fuel taxes and fees. Over the last decade, these investments have resulted in 4,206 projects totaling \$11.1 billion.

With continued investments from the General Assembly and Gov. Parson, the FY2025-2029 Statewide Transportation Improvement Program (STIP) makes available \$14.6 billion – the largest program to date – and funds more than 1,400 planned construction projects over the next five years, including design and project development costs. This includes \$10.7 billion in road and bridge construction contractor awards, which averages approximately \$2.1 billion per year. The program also includes General Revenue funds to widen and improve I-70, make systematic improvements to I-44, funding to fix low-volume minor roads, and make bridge improvements.

MoDOT works with its regional transportation planning partners to prioritize needs and fund projects that provide the greatest return on investment to taxpayers. Delivering such a high level of investment can only be successful through the true partnerships that MoDOT has with our private sector partners and contractors. Across every region of the state, feedback from Missourians has consistently prioritized maintaining the existing system as the highest priority. Other priorities include projects that improve safety and reliability, spurring economic growth and providing more transportation choices.

MoDOT has developed asset management plans for each district with the goal of maintaining current pavement and bridge conditions. The preventive investments in these plans help keep roads and bridges in good condition for longer. Research shows preventive maintenance solutions, such as cyclical overlays on roads in good condition, are the most cost-effective approach to taking care of road and bridge assets. Without these preventive maintenance investments, the cost of improving the asset in poor condition can cost four to ten times more.

“With continued investments from the General Assembly and Gov. Parson, the FY2025-2029 Statewide Transportation Improvement Program makes available \$14.6 billion – the largest program to date – and funds more than 1,400 planned construction projects over the next five years.”

MESSAGE FROM MoDOT

With such significant investments being made to improve I-70 and I-44, it's important to not lose sight of rural infrastructure needs. The Missouri Highways and Transportation Commission is continuing to invest in minor and low-volume pavement and bridges, with \$1.94 billion allocated for investment over the next five years. This includes thousands of lane miles of roadway improvements and hundreds of bridge repairs and replacements.

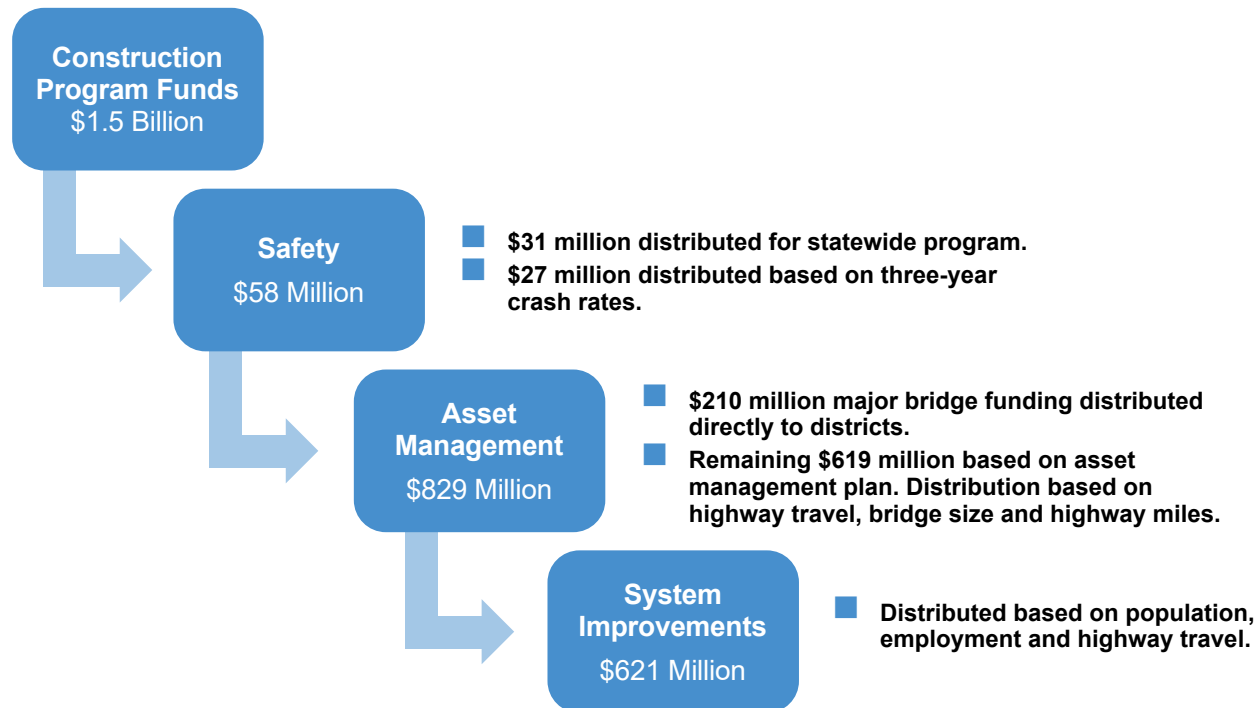

Each MoDOT district receives funding to invest in Missouri's transportation system. Since 2003, the MHTC has used a formula to distribute construction program funds for road and bridge improvements to each of its districts. The formula provides predictable funding for safety improvements, asset management and system improvements.

Working with industry partners, MoDOT stands ready to deliver the record number of projects listed in this document. Together, we can improve safety, increase mobility and support a prosperous economy for the state of Missouri.

Financial and Regional Planning Process Summary

The majority of funding for state roads and bridges comes from state and federal fuel taxes. Other funding sources include vehicle sales taxes, vehicle and driver licensing fees, interest earned on invested funds and other miscellaneous collections.

These funds are available for MoDOT's operating and construction program budgets. MoDOT's operating budget includes staff and expenses for maintenance, fleet, facilities, information systems and administrative activities. The remaining funds are available for the Program, which is the largest area of MoDOT's budget. STIP funds are allocated annually to districts using the following formula (based on 2024 categories and amounts):

Once construction program funds are distributed to districts, MoDOT collaborates with regional planning groups to identify local priorities based on projected available funding. The regional transportation improvement plans are brought together to form MoDOT's Program. There are two types of regional planning groups in the state: urban areas have Metropolitan Planning Organizations, and rural areas have Regional Planning Commissions. Board members for each of these groups are typically city and county leadership, elected officials and local business owners.

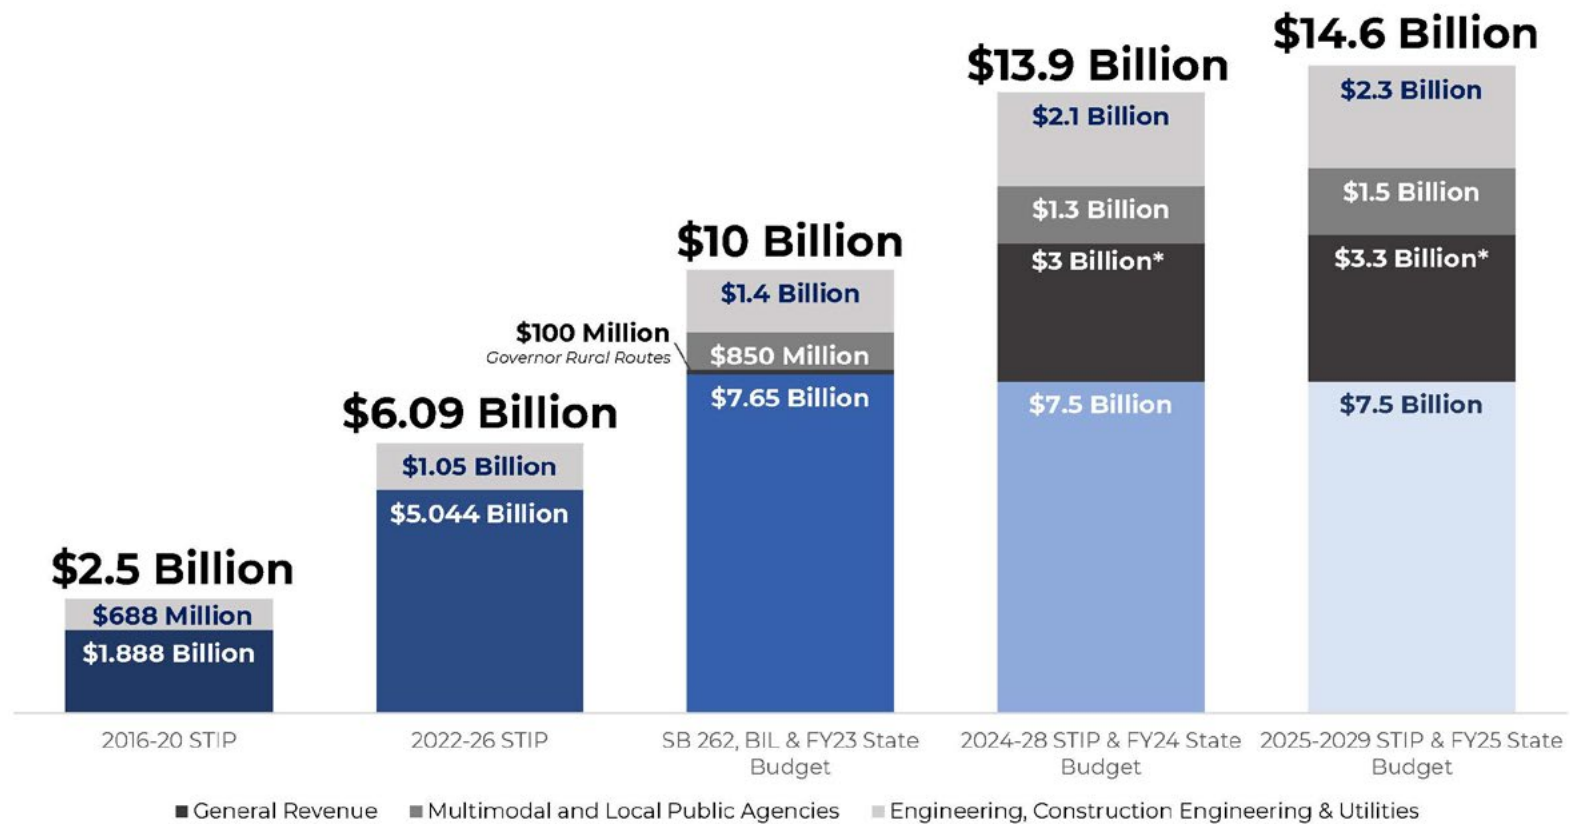

The regional planning groups reach out to local citizens to identify transportation needs. MoDOT staff assists regions to prioritize those needs based on road and bridge conditions, traffic safety data and overall mobility. The prioritization process also includes balancing priorities with available funds.

Reference Information

Asset Management	A strategic practice focused on using limited resources for the preservation, operation and management of the state's transportation infrastructure.
Capital Improvement Project	A transportation improvement that substantially increases the capacity of the transportation system, such as new travel lanes, interchanges or bridges.
Fiscal Year	This is the 12-month period to which the annual Program budget applies. The State of Missouri fiscal year is July 1 through June 30. The Program fiscal year is July 1 through June 30.
General Revenue	State funds lawmakers have the authority to allocate.
Inflation	Four percent project growth factor compounded annually is applied to right-of-way and construction in programs years 2, 3, 4, and 5.
Lane Miles	Represents the centerline length multiplied by the number of lanes on pavement improvement projects.
Length	Represents the calculated centerline distance on a project based on the primary direction of each route.
Payment Projects	A transportation improvement project administered by a partnering agency. The funding represents MoDOT's state and federal resources allocated to the project. Projects are noted with a "PAYMENT" watermark.
Rural Route Funds	The FY 2025 budget included \$100 million for low-volume minor routes across the state.
SB262	The 2021 senate bill increases Missouri's fuel tax by 2.5 cents annually each year for five years from 17 cents to 29.5 cents in 2025, the first Missouri state fuel tax increase passed in 25 years.
Est. Total Cost	Represents the planning estimates of the total costs of the project. These include: preliminary engineering, right-of-way, utilities, construction and construction engineering.

ABOUT THIS PROGRAM

The annual Statewide Transportation Improvement Program (STIP) provides information regarding the different levels of available state and federal road and bridge funds. The FY 2025-2029 program provides a record \$14.6 billion and more than 1,400 projects, including \$3.3 billion in General Revenue for Legislatively Designated Road and Bridge projects and multimodal projects.

*General Revenue for the Reconstruction and Expansion of Interstate 70, Improvements to I-44, Governor Rural Routes, and more

ABOUT THIS PROGRAM

This Road and Bridge program of the STIP is not fully programmed as our annual common practice, due in large part to ongoing inflation. This program is 90% programmed as a result.

The 2021 passage of state Senate Bill 262 increasing the Missouri state fuel tax for the first time in 25 years as well as the increase in federal funds from November 2021 Bipartisan Infrastructure Law (BIL) are shown in the list of projects on the following pages. Different levels of funding associated with SB 262, BIL and the potential debt issued by the Missouri Highways and Transportation Commission may affect this project list. Some projects on the page are grayed out. The gray color represents projects which could be removed with the repeal of SB 262, or because the project's bids exceeded the program estimate. Both possible actions are to help ensure the STIP's fiscal constraint.

	Number of Projects	Length	Lane Miles	Number of Bridges	Total Est. Cost (\$1,000)
Northwest	22	125.68	283.06	21	85,811

Operations and Maintenance Summary

Calendar Year 2024 - 2026

The information contained on the following pages shows planned work as well as routine maintenance work for the next three calendar years. The planned maintenance work is programmed at 80% the first year, 60% the second year and 40% the third year. The routine maintenance work is a projection of responsive work for the next three years, based on historic data.

	<u>Northwest</u>	<u>Northeast</u>	<u>Kansas City</u>	<u>Central</u>	<u>St. Louis</u>	<u>Southwest</u>	<u>Southeast</u>	<u>Central Office</u>	<u>Total (\$1,000)</u>
2024
